EASY FAST AND SECURE

With advanced features like a rotating keypad, self destruct mode, lightning fast USB 3.0 connection and high capacity storage with SSD options, you'll never look at external storage the same way again.

Say goodbye to complicated software or drivers – all DL3 encryption, administration, and authentication are performed on the unit itself and managed through easy-to-use touch screen technology.

Patented touch-screen technology

The rotating keypad prevents surface analysis for fingerprint or pattern examination and the self-destruct mode wipes the encryption key after a customizable set number of failed password attempts.

The keypad features an alphanumeric, backlit, patented touchpad allowing you to set a strong password for ultimate security. Combine that with 100% hardware based AES 256-bit encryption, and you can rest assured your data is secured.

The DL3 supports an administrator password (full permissions) and a user password (limited permissions) to control access to advanced menu options. The Auto-Lock and Read-Only are advanced features accessible from the administrator menu that ensure your data is protected and uncompromised.

Speed. Storage. And the ultimate in data security – all in the palm of your hands.
